# NIKHIL BANSAL

*Python Developer*

Noida, Uttar Pradesh | nikhil.bansal@example.com | +91 99XXX XX708

## PROFESSIONAL SUMMARY

Backend developer with 4 years of experience in Python and Django. I have mostly worked on REST APIs for e-commerce and logistics platforms, along with the database design, background jobs and deployments that come with them. Comfortable owning a module end to end and working directly with the frontend and QA teams.

## TECHNICAL SKILLS

Languages: Python, SQL, JavaScript (basic)

Frameworks: Django, Django REST Framework, Flask, FastAPI (learning)

Databases: PostgreSQL, MySQL, Redis, MongoDB (basic)

Tools: Git, Docker, Celery, RabbitMQ, Nginx, Jenkins, Postman, Jira

Cloud: AWS EC2, S3, RDS

## WORK EXPERIENCE

**Software Engineer - Backend** , Nimbus Logistics Tech, Noida Mar 2022 - Present

- Develop and maintain the shipment tracking APIs (Django REST Framework) used by our mobile app and around 300 warehouse partners.
- Designed the PostgreSQL schema for the new returns module and wrote the scripts to migrate two years of old data.
- Moved slow report generation to Celery workers with Redis, so the dashboard no longer times out at month end.
- Integrated two courier partner APIs and added retry and backoff handling for their webhooks.
- Write unit tests with pytest and review pull requests for a backend team of 6.

**Python Developer** , Craftbox Solutions, Gurugram Jul 2020 - Feb 2022

- Built REST APIs for an online furniture store: product catalogue, cart, coupons and Razorpay payment integration.
- Customised the Django admin panel for the operations team (bulk actions, filters, CSV export).
- Wrote small pandas scripts to clean vendor product sheets before bulk upload.
- Fixed production bugs reported by customers and sped up slow pages using select_related, prefetch_related and proper indexes.
- Set up the first Jenkins pipeline for the project to run tests on every merge.

## PROJECTS

Expense Splitter - Django + React side project to split trip expenses among friends. Deployed on an EC2 free tier instance with Nginx and Gunicorn.

Library Management System - College project in Django with book issue/return tracking and automatic fine calculation.

## EDUCATION

**B.Tech, Information Technology** , Amity University, Noida, 2016 - 2020, CGPA 7.6

**Class XII (CBSE)** , Delhi Public School, Ghaziabad, 2016, 86%

## ACHIEVEMENTS

- Got the Star Performer award for Q3 2023 at Nimbus Logistics Tech.
- Solved 400+ problems on LeetCode and HackerRank in Python.
- Gave an internal talk on Django ORM performance to the engineering team.

## PERSONAL DETAILS

Languages: Hindi, English
Hobbies: Cricket, trekking in Uttarakhand, reading engineering blogs
